

Job Description: AI Software Engineer

Company: Future AI Solutions

Role Overview:

We are looking for an AI Software Engineer to build agentic pipelines.

Required Skills:

- Professional experience with Python and FastAPI.
- Experience building single-page applications with React.
- Familiarity with multi-agent orchestration frameworks (e.g., LangGraph).
- Understanding of vector databases and semantic search.

Preferred Skills:

- Experience with Docker, Vite, and vanilla CSS.
